matching test methods with various requirements.

Product Qualification Test Methods for S20.20

Did you know that ANSI/ESD S20.20 requires you to have proof that all of the products you use to control static in your process have been tested and meet the requirements of S20.20 or one of its sub-tier documents?

It is likely that the new version of S20.20 (planned to be released sometime in early 2014) will make this requirement more stringent. Included in the new version will also be more emphasis in the ANSI/ESD STM97.2 walking voltage test for footwear/flooring qualification.

This webinar will discuss and demonstrate the various requirements in S20.20 and the test methods used to verify those requirements. The student will come away understanding the requirements and how the tests are performed in order to knowledgeably verify that their company's products will perform as advertised.

This webinar will be highly interactive and will present some examples of test methods to satisfy requirements. Attendees will be encouraged to ask questions.

The Webinar format offers VoIP and phone line connections. You will be able to talk directly with our team of experts and see our cursor pointing to discussion topics and slides.

Ted Dangelmayer
President & CEO
Dangelmayer Associates, LLC.

WHO SHOULD ATTEND

This instruction is intended for professionals who have a basic understanding of ESD and wish to learn more.

THE WEBINAR FORMAT

A live Webinar is one that you can "attend" and participate in right from your office. The savings are significant - no travel time or hassle and no travel expense. It's easy; you only need a telephone or VoIP and access to the Internet.

The audio portion is delivered over the telephone or VoIP for reliable and clear sound quality. At the same time, talk with the experts as you view the speakers' Power Point presentation.

The Webinar is also interactive so you will be able to ask questions of the experts and provide comments during the course of the program. Questions may be submitted prior to the Webinar: Vicki@Dangelmayer.com.

WEBINAR INFORMATION

Date: Tuesday, December 10, 2013
11:00 am to 12:30 pm Eastern

Dial-in instructions as well as the URL address for accessing the Webinar will be e-mailed to you in advance of the program.

WEBINAR FEES:

NONE

Please note: One registration entitles you to one telephone connection and one computer connection at one physical location. Any transmission, retransmission, or republishing of the audio or web portion of this program is strictly prohibited. International registrants may incur additional phone charges.
